

Installing your powerline adapters – Plusnet Help

(DESCRIPTION)

A woman in a Plusnet shirt standing in front of a Plusnet banner.

(SPEECH)

Hi I'm Katie and welcome to Plusnet Help.

Today I'm going to show you how to set up your powerline adapters provided by Plusnet.

The powerline adapter that you have ordered means that you can connect your YouView or YouView+ box to a router far away.

Here is how to set it up.

Inside your box you will find 2 powerline adapters.

Plug one powerline adapter into a plug socket near your router and run the LAN cable that we provided between the two.

Then plug the second powerline adapter into a socket near your YouView or YouView+ box and then just run a LAN cable again between the two.

And that's it! If you haven't already set up your YouView box or YouView+ box then you can watch one of our setting up videos here.
